ALTER TABLE

Jessica has a list of the cities she has visited:

cities

name	country	population
Lisbon	Portugalia	504718
Madrid	Spain	3223000
Paris	France	2161000

She is going to add the most attractive places she visited in each of the cities.

Add a new column 'AttractivePlace' and **update** the values:

- 'Belem Tower' for Lisbon
- 'Plaza Mayor' for Madrid
- 'Eiffel Tower' for Paris

Then show the resulting table

SQL

```
1 alter table cities add AttractivePlace varchar(128);
2
3 update cities
4 set AttractivePlace = 'Belem Tower'
5 where name='Lisbon';
6
7 update cities
8 set AttractivePlace = 'Plaza Mayor'
9 where name='Madrid';
10
11 update cities
12 set AttractivePlace = 'Eiffel Tower'
13 where name='Paris';
14
15 select * from cities;
```

You're on fire!
